

CHALLENGE #3

- Modify the code we used in the class to search for specific location
- Output should be formatted exactly as following:

Your requested venue: "Stanley Park"

Address: Stanley Park, Vancouver, BC V6G 1Z4, Canada

Status Code: "OK"

Location Type: "GEOMETRIC_CENTER"

- Rules:
 - use template objects
 - 1 point for one word search
 - 2 points for multiple words search(hint - use *encodeURIComponent* method)
